

LET'S BUILD A PEACEFUL SOCIETY

In the beginning, the plan of God on earth was perfect and marvellous. He created human according to his image and likeness to rule, control, and manage His creation on earth. He created a peaceful and orderly world for human to live in. But when the time went by, the man disobeyed God and committed a sin, according to the book of Genesis. They violated the rule of God and their intimate relationship between God and human was cut. As a result, the curse of sin has been passed on until to our generation which continually creates chaos to our society.

In spiritual realm, we cannot deny the reality that *right* and *evil* things in our society exist because it started at the very beginning of the creation of man. Look around to our society and observe, make some time to ponder this question: Is this the place that we want to live and raise our children? Every day the flood of images on our television tells the story about death, conflict, man-made disaster, crime, etc. The future of our children is now full of fear. There are thousands of mothers who cry for losing their children and it testifies the undeniable fact created by human. They don't care for the innocent people who might be suffering for their action because of their hunger in power.

When the evil people find ways to rule our society we should not allow them to destroy humanity. The change is in our hands. We will build a great country. We must stand and be firm to uphold what is right. We must fight what is right even people around us won't. We must walk in the right way. We will show to the world the unity we have to enforce it. It's because I believe that peace will also set us free from a chaotic world. And the brighter future for our people will bring us success to our country. We will always keep on praying that the best plan of God may continue to have a peaceful and orderly society
