Help:Soft redirect

A **soft redirect** is a very short page that essentially tells users to look at another site to obtain the information they were seeking.

To create a soft redirect, place the `{{Soft redirect}}` template on the page (e.g. `{{Soft redirect|http://cotw.cc/wiki/http://cotw.cc/wiki/Green_knowledge_ecosystem|Green knowledge ecosystem on the COTW wiki}}`).

The template will automatically categorize the page into Category:Soft redirects.

**Guidelines**

Soft redirects should generally only point to wiki sites, and generally should be applied or approved by an admin. (This is a proposed guideline. Discuss changes on the [talk page](https://).)
