

Design no 1 page ①

Basic Principle

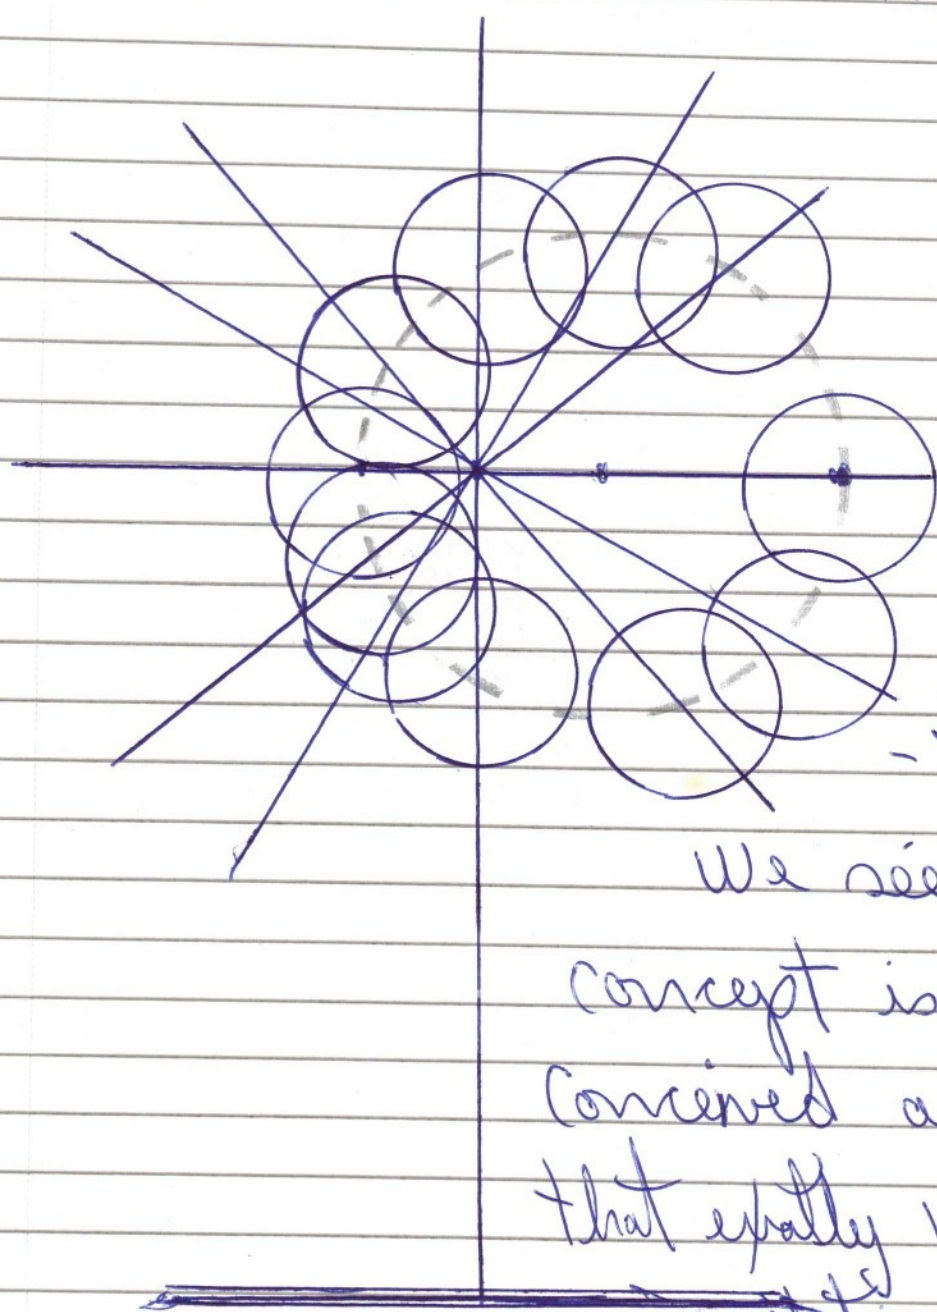

Based on the foregoing, if we were to perform a complete 360° rotation starting from the Horizontal position, that is, the 9 and 3 o'clock position, so that these masses return exactly to their starting position of 9 and 3 o'clock after their complete revolution, we would proceed as follows:

3

this will give us this overall
configuration of element mutually
connected to the aple and
obviously rotating to the right...

Strongly

- more important-
ly, in fact,
we see that this
concept is primarily
concerned as a crane, and
that exactly what I call a
gravitational turbine.
