

Learning Target 6: I can perform the removal of a cortical window (Meeting learning target 4 is a prerequisite)

SKILLS:	EMERGING <i>(I am just getting started on this skill)</i>	APPROACHING <i>(I am still developing this skill)</i>	MEETS <i>(I am competent and confident in this skill)</i>
Drill multiple uni-cortical holes in an oval shape	Able to drill unicortical holes circumferentially with difficulty	Able to drill unicortical holes with good spacing and timing	Able to use the osteotome to connect the drill holes without plunging
Complete the cortical window using an osteotome	I have difficulty completing the cortical window with an osteotome	It takes me considerable time to extract cortical window	Able to complete the cortical window
Extract the cortical window using an osteotome or bone nibbler/rongeur
