## MEMORANDUM

---

**To:** Professor Grafman

**From:** Terran Hilden, Patrick Hassett, Robert Williams, and Kaileigh Vincent-Welling

**Subject:** Section 3: Alternative Solutions

**Date:** March 10, 2014

---

### **Purpose**

The purpose of this memorandum is to submit a draft of our Alternative Solutions for our design project. In doing so, we hope to provide enough information to be able to compare and contrast to decide on the best-fitting solution for our project this semester.

### **Discussion**

Within the Alternative Solutions document are different ideas of what our project could be and how all aspects could be set up, based upon our criteria and restrictions. The information provided for each alternative solution will hopefully allow our group to compare and contrast and, ultimately, allow us to logically pick a design path for our project. We would like you to review our “Vegtacular” solution, please.

We would also like to thank you for reviewing this document and look forward to hearing any feedback you have.
