
MEMORANDUM

TO: PROFESSOR LONNY GRAFMAN
FROM: GANNON CARROLL, MAX WRIGLEY, FELIX CHAVEZ, LUKE PASCASIO
SUBJECT: ENGR. 215 10-WEEK PROJECT: PROBLEM ANALYSIS
DATE: FEBRUARY 28, 2017

The purpose of this memo is to submit our problem analysis, consisting of an introduction, specifications, considerations, criteria, usage, and production volume.

Attached to this memo is the problem analysis. We feel confident with all the materials we are submitting, however, our team wasn't sure if we had any considerations pertinent to our project, other than that we can't build the product at their school, which is obvious. Other items that could have been put into this section were more criteria than considerations. If you have any ideas for more considerations we can put into our problem analysis, they would be greatly appreciated.

We look forward to receiving your feedback on our problem analysis.
