

During the Second Semester

Limbaga, Bianca Yzabela R.
11 - Nintai (ABM)

01 *Web Page*

When the 2nd Semester started, the first thing that we did in our Empowerment Technology Subject was making our own Web Page. It was hard at first because there is a lot of codes I need to input to make my first Web Page. Our sensei gave us some example on how to make a Web Page if we still can't get the examples.

02 *Poster, Logo, Label & Infographics*

Next is I learned how to create a poster, logo, label, & infographics for my future business. My business is about Pastry Shop. Making this activity helped me to be creative in making these. Making this creative helped you to attract customer in the future. Learning this also helped me enhance my skills and abilities in editing..

03 *Use of Social Media to Advocate*

Last, we learned about using social media to advocate. This activity taught me on how I can advocate with the use of social media. We are tasked to post our video about advocating on the certain topic the we chose. Also this topic helped us to speak up about the current or the issues in the community.

04 *Lesson Learned*

Learning all of these topics will help me in the future. This can be used in the future preference. Learning in this subject is not easy as you think. It may be hard at first, but if you continue to try, you can do it.
