reserve, preserve, rejuvenate and conserve invaluable resources
save a little

sasrai is global movement. A Movement to reserve, preserve, rejuvenate and conserve. It is an appeal -- appeal to all those who care for the future generation; who care for the state of the world. Appeal to all, across the globe irrespective of class, sect, race, caste, creed and ethnicity. Let us adopt a missionary zeal, a sporting spirit to reserve, preserve, rejuvenate and conserve the invaluable resources for our next generation.

sasrai is still in its infancy. It is still an unstructured movement. It is our belief that enthusiastic and altruistic persons across the globe will gravitate together to fine tune models to strengthen **sasrai** -- the movement -- among the people of the world. It is our belief that a coordinated and collaborative effort based on a framework of action, can offer us a smooth road to triumph. There are people; very eager, waiting in the wings for a cue to start and promote such a movement.

Yes, each and everyone have the freedom to design a program within the contextual relevance of a country, community, ecology and environment. We have no doubt that voices from a million corners shall contribute to a world policy to reserve, preserve, rejuvenate and conserve invaluable resources – air, water, oil, electricity, gas, time and forests.

It should not be difficult to **save a little**. Little drops of water make the mighty ocean. Prudence can save huge resources for our children and descendants. If the 140 million people of Bangladesh use just a liter of water less per capita daily (cpd) there would be, at 200 liter cpd, enough water saved for two and half cities the size of Dhaka. Ponder for a while the global saving from frugal use of resources. The little saving at an individual level can meet the needs of those who do not have enough of anything except poverty. In this little step in frugal living lies the difference between destruction and future survival of mother earth and mankind.

We appeal to all -- researchers, intelligentsia, educationists, journalists, economists, teachers and leaders -- to initiate and promote a movement for a frugal life style. Let us be introspective and ask ourselves, when using anything, "Is it of utmost need for me or how many inhabitants in the world are able to use this amount right now?"

Let us come together to bring attitudinal and behavioral change among people on the use of resources. Some day we may be able to easily withstand disasters like cyclone, hurricane, earthquake or even tidal surge. But would it be so easy to create safe air, potable water or any other natural resources?

We welcome/solicit your suggestion, discussion, dialogue

Road map towards the implementation of the United Nations Millennium Declaration

SASRAI brings into focus Six MDGs, 09 time-bound targets and 31 quantitative indicators Sasrai is still in its infancy. Let us join hands, advance in unison towards a healthier present and a better future for our planet earth.

GOAL 01: ERADICATE EXTREME POVERTY AND HUNGER

TARGET 1: Halve, between 1990 and 2015, the proportion of people whose income is less than one dollar a day

TARGET 2: Halve, between 1990 and 2015, the proportion of people who suffer from hunger

GOAL 02: ACHIEVE UNIVERSAL PRIMARY EDUCATION

TARGET 3: Ensure that, by 2015, children everywhere, boys and girls alike, will be able to complete a full course of primary schooling

GOAL03: PROMOTE GENDER EQUALITY AND EMPOWER WOMEN

TARGET 4: Eliminate gender disparity in primary and secondary education, preferably by 2005, and in all levels of education no later than 2015

GOAL 04: REDUCE CHILD MORTALITY

TARGET 5: Reduce by two third between 1990 and 2015, the under-five mortality rate

GOAL 05: IMPROVE MATERNAL HEALTH

TARGET 6: Reduce by three quarters, between 1990 and 2015, the maternal mortality ratio

GOAL 07: ENSURE ENVIRONMENTAL SUSTAINABILITY

TARGET 9: Integrate the principles of sustainable development into country policies and programs and reverse the loss of environmental resources

TARGET 10: Halve, by 2015, the proportion of people without sustainable access to safe drinking water and basic sanitation

TARGET 11: By 2020, to have achieved a significant improvement in the lives of at least 100 million slum dwellers

Quantitative indicators

01. Proportion of population below \$1 (PPP) per day a
- 01A. Poverty headcount ratio (percentage of population below the national poverty line)
02. Poverty gap ratio [incidence x depth of poverty]
03. Share of poorest quintile in national consumption
04. Prevalence of underweight children under 5 years of age
05. Proportion of population below minimum level of dietary energy consumption
06. Net enrolment ratio in primary education
07. Proportion of pupils starting grade 1 who reach grade 5 b
08. Literacy rate of 15–24 year-olds
09. Ratio of girls to boys in primary, secondary and tertiary education
10. Ratio of literate women to men, 15–24 years old
11. Share of women in wage employment in the non-agricultural sector
12. Proportion of seats held by women in national parliament
13. Under-five mortality rate
14. Infant mortality rate
15. Proportion of 1 year-old children immunized against measles
16. Maternal mortality ratio
17. Proportion of births attended by skilled health personnel
20. Ratio of school attendance of orphans to school attendance of non-orphans Aged 10–14years
21. Prevalence and death rates associated with malaria
22. Proportion of population in malaria-risk areas using effective malaria prevention and treatment measures e
23. Prevalence and death rates associated with tuberculosis
24. Proportion of tuberculosis cases detected and cured under DOTS
25. Proportion of land area covered by forest
26. Ratio of area protected to maintain biological diversity to surface area
27. Energy use (kg oil equivalent) per \$1 GDP (PPP)
28. Carbon dioxide emissions per capita and consumption of ozone-depleting CFCs (ODP tons)
29. Proportion of population using solid fuels
30. Proportion of population with sustainable access to an improved water source, urban and rural
31. Proportion of population with access to improved sanitation, urban and rural

sasrai is a Movement; a Global movement; a Movement to reserve, preserve, rejuvenate and conserve. It is an appeal to the friends of the present and the future, an appeal to all, across the globe irrespective of sect, race, caste, creed and ethnicity.

We can all involve ourselves with the movement at any moment in our own unique way. Anyone who consciously thinks of saving anything acts in support of his movement. Every thought, every bit of saving and optimization contribute to mankind, nature, bio-diversity, ecology and environment.

- 0 Global community can be proud of many impressive achievements. Yet an overwhelming majority of humanity does not have access to basic need and rights. A large number of people abuse available resources to the detriment those without resources and mother earth. Abuse is evident everywhere – at home, work place and even in recreation. It is the time to pause, look back and reflect.
- 0 Since time immemorial human civilization has found peace only to destroy it again. Man have searched and researched, devised incredible machines, created means of production, has learned to generate wealth yet has not been sensitive, cautious, or sincere his environment. Man has wrought irreparable damage to the environment and has been responsible for the extinction of many species of living organisms.
- 0 Mankind has been ruthless with the nature. Among other things, man has decimated the forests, polluted the waters, hunted many living species to extinction and pierced the ozone layer. The irresponsible use of the natural systems has ushered in disastrous consequence. Nature in its infinite generosity has been patient and has borne the brunt of man's actions silently. No more; it is angry and has started striking back. Voices can clearly be heard but Man does not pay heed to them and continues with his foolish ways.
- 0 It is time to reassess our attitude to life, living, nature and mother earth. Let us listen, think, debate, re-evaluate, search and research and agree on a minimum program to avoid disaster of monstrous proportion. Let not this century be mankind's last on this earth.
- 0 sasrai will have a multi dimensional impact on all. It will have positive impact on people, community, nation, human race and the universe. Proponents would directly benefit in terms of reduction in daily or monthly expenditure. sasrai would do more with less making existing resources last longer.
- 0 Commitment to frugal use of resources will directly affect other fellow beings. For instance inadequate water and power is common feature in all communities in developing world. Being vigilant against wastage would leave more power and water for the poor who access water and power with much difficulty.
- 0 Let us adopt a missionary zeal, a sporting spirit to reserve, preserve, rejuvenate and conserve the invaluable resources for our next generation.
- 0 We believe that everyone could participate and own the program and could contribute to the movement. We believe in the human race, it unlimited creativity and potential. Given a little commitment any individual can preserve, reserve, rejuvenate and conserve resources in her/his personal life.

save a little, reserve, preserve, rejuvenate, conserve

- 0 There is no dearth of human resource all over the world to shoulder the responsibility of spreading the message of **sasrai**. What is needed is proper tuning to the theme. There are people, unknown, unrecognized and unsung waiting for the message of **sasrai** and ready to take on the challenge in the fight to preserve, reserve, rejuvenate and conserve resources.
- 0 **Let us** each and every individual join hands, network, commit our time and work together to advance the cause of **sasrai**.

Our initiative would contribute

- Reduce global warming trend;
- Lessen the threat of disaster;
- Lessen saline water intrusion into fresh water;
- Reduce waste;
- Lessen the intensity of environmental and ecological hazards;
- Reduce threat of extinction of many creatures;
- Conserve biodiversity; and
- Face the challenge of Climate Change

Dear Volunteer

sasrai wish the peaceful and prosperous living for all creature on earth, on the eve of

suva bangla naba barsha

Dear Volunteer

Hope the best for you all. We believe that all of us are very committed and dedicated to spread the message. We will celebrate the fourth anniversary of the founding of **sasrai** movement on 14th April on the day of Suva Bangla Naba Barsha. Recent UN climate report declares the need for such a movement. When our DESA chairman urges us to keep off at least one bulb in every family, the Italian Government requests a reduction in household water consumption and Government of China urges for a vehicle-free day, they are only reinforce the imperative of **sasrai** as a movement.

Let us renew our vow of commitment and perseverance to strengthen and advance the cause of the movement.

Thanks.

Dear Madam/Sir

Greetings from sasrai-**Movement**

There are many truths and disagreements on globe but we are undivided on one truth. We all agree that a **large portion of the world population** is in extreme poverty. Poverty still grips more than half the people in the world. They do not have easy access to housing, food, education, water sanitation and other amenities of life. There are so many factors that perpetuate the poverty of the poor.

On the other hand the earth is getting warmer. The earth and its ambient natural systems to which we owe our existence are at stake. Human "behavior/practice unfriendly to the nature" has brought about this state of affair. Is this behavior/practice only by the rich or by some rich industrialized country? They certainly have a major contribution but the poor also contributes their share. Poor's life and living highly nature depending for their livelihood on nature often abuse its resources. Controlling these abuses could contribute in checking environmental degradation.

sasrai believes that the absence of **initiative and practice in optimization of resources** among the poor is one of the major factor contributing to their poverty. **The sasrai movement promotes prudent, thrifty use and conservation of resources**, urges all to be patient and frugal in practice to **reserve, preserve, rejuvenate and conserve invaluable resources**.

"**sasrai-movement**" aims at inciting individuals, families, communities, institutions and organizations to combat Poverty, Disaster, Climate Change, Global Warming and Wastage. Since 2004 a group of NGO has been supporting this program across the country.

We believe that every individual, family, community, office can support the theme of this movement. Some of us bemoan the lack of water, climate change, global warming but the general mass - the most important stakeholder - are yet to realize that global resources are limited. There has been much research but the findings stay confined mostly in the laboratories and libraries. It is time to disseminate the findings and translate them into reality. We have to bring about behavioral and attitudinal change among people or else we have no hope for the future.

We have to change the current life style and the use of resources. We must stop over-use and abuse. "**Need based appropriate use Practice**" could save resources for the poor and for our next generation as well.

If individual are attuned to "**Need based appropriate use Practice**" the existing resources could serve more people than the present.

Madam/Sir I believe all of use can do our own bit. You can formulate your own concept on "sasrai-movement" and spread it among your member organizations, their staff, volunteer and community across the country/globe. Think on it, form a vision and a mission to take the movement forward. Every one of us is busy; we have much work to do. Nonetheless, think of the benefit the sasrai movement will bring to the poor, to the mother earth and the future generation. This cannot be measured in financial terms.

Should you have query feel free to contact us.

Madam/Sir may we strengthen our hand through sharing and caring?

Warm Regards.

Thanks.

Dear
Mr. David Plater
Coordinator, Service Support & Awards Department
Rotary International
Programs Division (PD210)

Greetings

Do accept my heartiest and felicitation for your message. I am very thankful for your patience hearing and supportive response. Once again I like to express my thanks and gratitude to you and President, Mr. Wilf Wilkinson.

Dear Mr. Plater I will request you to look at attached document for a few moment. **sasrai-Movement** is holistic movement that encompass everything that is needed for survival of all living beings. According to you, there are 32,000 Rotary clubs around the world. If we assume that on an average every club represent 50 families through their membership we are talking about a total of 1,600,000 families. If every family can be motivated in frugal us of water for instance, a minimum 100 liters may be saved in each family and total would be 8,000,000 liters. This could serve the poor who suffer deprivations of all kind.

Just through a positive behavioral change **Rotarian** can rightfully claim that they are donating 8,000,000 liters of water daily to the humanity and nature. Stop for a while, give it some thought! If you can extend this to use of other resources the saving in money, resources, contribution to the poor and to the health of mother earth can be immeasurable. The credit for this would accrue on the **Rotarian** round the globe.

Dear Mr. Plater, it is not necessary that you help me or **sasrai-Movement** but you could help the Earth we live in and the Humanity. Take a while from your busy schedule; send a letter to all the other Rotary Clubs. Please share this appeal with the President.

An appeal to join a movement is not an appeal for funds. **sasrai-Movement** does not crave after funds what it does crave after is support from organization such as yours to bring about an **attitudinal change in the judicious use of resources for the sake of the earth, humanity and the universe.**

Thanks.

Dear Friends, Well Wishers and Volunteers

Happy New Year

Wish the best creative time for you all, humanity and earth.

May the **New Year** bring you peace, prosperity and creativity. Looking forward to working with you in the New Year

New Message - Fund Raising Kick start/ sasrai-movement bank inauguration

sasrai-movement is trying to raise funds from its friends, well wishers and volunteers to carry on its activities. In response to the appeal engineer Mr. Motasim Billah, Naogaon, donated an earthen "bank", a traditional money saving earthen pot in Bangladesh on December 31, 2007. Mr. Azad, research officer, JADE (Japan Association of Drainage and Environment) wrote the name sasrai on the earthen pot.

Mr. Tofayel Ahmed, Deputy Country Representative, JADE-Bangladesh was the first person to put a 10 taka note into the "bank". About 10 of our SPACE colleagues followed Mr. Tofayel. JADE-Bangladesh office kindly agreed to keep the "bank" on the chief's table so that persons willing to contribute to sasrai can put money, whatever the amount, into it.

sasrai-Movement is trying to mobilize in local resources. It's fund raising policy, proposed by Farooque Chowdhury, one of sasrai volunteers, is the following:

01. Rely upon own community first.
02. Participatory.
03. Transparency.
04. Accountability.

On the basis of these policies he has also proposed that

1. All sasrai volunteers should first of all try to collect / mobilize local resources, funds from own locality/ friends/ relatives/ interested persons;
2. All funds collected should be kept at the local level;
3. Local volunteers, if it is the local community it will be better, will collectively decide the utilization of the fund, their share in the central activities;
4. Any person, other than a lunatic has all the rights to ask/raise questions regarding the fund, check / supervise the fund, books of accounts, etc.;
5. Keep the money in a pot or an envelope till the fund is small in size and put the detail accounts on large sheets of papers and hang those sheets of papers in a public place so that all persons can have a look. If they wish. With the passage of time sasrai will open its bank accounts, follow all standard book keeping procedures practices and always keep its account open for checking by any one including the lawful authorities of the land. All chapters / branches of sasrai will decide its use of funds.

The sasrai secretariat calls comments/opinions on the above mentioned proposals made by Farooque Chowdhury.

At the same time the sasrai secretariat appeals to all;
Please contribute to sasrai whatever you have and whatever you like.
sasrai needs funds to accelerate its activities.

Dear All

Let's we appeal to all

- Please, save a drop of water daily, during all water related activities.
- Please, keep off electric appliances one minute daily,
- Please, suspend travel by personal car once a day.
- Please, keep a day in a week luxury free.
- Please, plant at least a tree annually in own home or in the community.
- Please, do not throw away the waste wherever you like.

This can be elaborated. Any citizen of this world can add to this appeal, elaborate the appeal.

Please, complete the equation of "a drop", "one minute", "once", etc. It will at least be 30 a month per person, 300 per 10 persons, 3,000 per 100 persons. And, the numbers will jump upward dramatically along with the increase in number of persons, of communities, of days, months and years. Please, have a minute to ponder over the ecological equation. This was also proposed by Farooque.

sasrai principles, proposed by Mr. Farooque Chowdhury, Founder Volunteer December 14, 2007

- Decentralized, democratized, participatory, transparent, accountable, flexible -- as much as possible.
- Accountability to all.
- Anyone could ask about any subject / issue concerning Sasrai.
- Volunteers answerable/ accountable to everybody, everywhere, all the time.
- Each volunteer will mobilize fund, collect and kept it in a transparent pot(simple plastic bottle) till handed over to the collective body / organ.
- Please keep it in an open place, as much as possible. As a result everyone can see the fund.
- Fund could be spent anytime locally as per decision of local person in favor of sasrai.
- Please keep income and expenditure sheet beside the box (hand writing is enough).
- Mark the pot / box / bottle **sasrai** (hand writing is enough).
- Never think that someone might take away the fund. If that happens, please, consider that "It was her / his due need".
- sasrai is confident that it is morality and civility that will ultimately prevail.

Please refine, add, suggest, propose + + + + +
 Please feel free to contact for any query

- Please, do not throw away the waste wherever you like.

This can be elaborated. Any citizen of this world can add to this appeal, elaborate the appeal.

Please, complete the equation of "a drop", "one minute", "once", etc. It will at least be 30 a month per person, 300 per 10 persons, 3,000 per 100 persons. And, the numbers will jump upward dramatically along with the increase in number of persons, of communities, of days, months and years. Please, have a minute to ponder over the ecological equation. This was also proposed by Farooque.

sasrai principles, proposed by Mr. Farooque Chowdhury, Founder Volunteer December 14, 2007

- Decentralized, democratized, participatory, transparent, accountable, flexible -- as much as possible.
- Accountability to all.
- Anyone could ask about any subject / issue concerning Sasrai.
- Volunteers answerable/ accountable to everybody, everywhere, all the time.
- Each volunteer will mobilize fund, collect and kept it in a transparent pot(simple plastic bottle) till handed over to the collective body / organ.
- Please keep it in an open place, as much as possible. As a result everyone can see the fund.
- Fund could be spent anytime locally as per decision of local person in favor of sasrai.
- Please keep income and expenditure sheet beside the box (hand writing is enough).
- Mark the pot / box / bottle **sasrai** (hand writing is enough).
- Never think that someone might take away the fund. If that happens, please, consider that "It was her / his due need".
- sasrai is confident that it is morality and civility that will ultimately prevail.

Please refine, add, suggest, propose + + + + +

Please feel free to contact for any query

sasrai-Movement

Help sasrai that helps to combat **Climate Change, Water, Disaster, Global Warming, Ecosystem, Poverty, Biodiversity, Electricity, Gas, Waste + + + +**

Please look at the future and imagine the world our children and grandchildren may grow up in

Dear

Greetings from **sasrai-Movement**

Please contact for theme on "**sasrai-Movement**"-that promotes prudent and thrifty use and conservation of resources. The movement aimed at to animate each individual, family, community, institution, organization to combat **Poverty, Disaster, Climate Change, Global warming, Ecosystem and Biodiversity** etc. Since 2004 a group of NGO has been trying this program across the country.

We are in need of volunteer across the globe. Please help.

Gareeb

save a little, reserve, preserve, rejuvenate, conserve
Earth can meet the need not greed/abuse

Sustainable **a**ugmentation
Solicited **r**estraint
animated **i**ntegrity

Dear Eric Martin

Greetings

Please find the initial logo of sasrai. The symbol is Green Field for green world, mind whatever we say and the Red Round is Sun signify light for all.

Please let me know your comment.

Hope you the best.

Dear Jessica

Greetings from sasrai-Movement

We are in need of help to develop website. Please help the movement.

Dear idealist friend

happy valentine's day

every February across the Globe different lovely gifts exchanged between loved one, in the name of St Valentine. let's we exchange the idea of sasrai-Movement (that promotes prudent and thrifty use and conservation of resources) this February among us and global community in the name of earth, humanity, our future generation.

hope you all the best love and lovely time.

Gareeb

Work Locally Serve Globally--Local Initiative Global Outcome

"Plant for Planet-Water for World"

"the earth doesn't belong to us, we belong to earth"

"everything on earth has a purpose, every person, mission"

"We never know the worth of water till the well is dry." France

The best way to find yourself is to lose yourself in the service of others- Gandhi

"We will find fulfillment not in the goods we have, but in the good we can do together" Kennedy

"Let's be a desired friend to all living body, humanity and earth"

NB. Please forward the theme to other like minded organization, institution and individual and take initiative to strengthen the movement that could contribute much for the globe whatever we think -

Poverty, Climate Change, Disaster, Global warming, Ecosystem and Biodiversity
