

Jan 6

team re meet also  
Home work

251353927

P 9 I

Why #1, previous 2  
Created the side and doc to work in

I want to use 5 whys on a bit starting with non-robotic scope

plates on ground at ~~times~~ times - traffic calming ~~questioning~~

Vertical ?

Why 1  
1. People mistakes  
2. it looks too safe to move around  
3. existing systems have problems  
not automated?

notes

Why 2.1  
people make mistakes  
↳ 1. insufficient training → have become complacent  
↳ 2. communication errors

lots of changing  
from team but some  
work looks like it  
req in done in class

Why 2.2  
looks safe → 1. not enough intentional obstacles

Why 2.3  
existing has problems → 1. no automation  
2. over reliance on automation  
fatigue considered  
fatigue considered

Why 3.1  
1.1 insufficient training → 1. lack of knowledge → 2. Poor instruction

Why 3.1.2  
complacent → 1. "done it million times" experience  
2. not enough consequences  
↳ intentional blame makes you think

Why 3.1.3  
communication errors → 1. intentional → 2. accidental → 3. technical

Why 3.2.1  
intentional obstacles → obstacles can be dangerous

Why 3.3.1  
no automation → seen as not necessary

to be continued

Why 3.3.2  
too much automation → helps make it safer

putting it on doc / power point
