

How I Overcome Plenty of School Works

Having a plenty of school works is not easy. I believe in saying that no matter how many projects or school works have given you if you have a determination to pursue your dreams and your studies you must work hard and strive for it.

For now, the semester is over my first thoughts about our overall projects are mixed sometimes it gives me positive effects followed by negative. Because I'm not good in media or computer stuff and it was very tiring, and it is draining me however positive since I learned different things how to apply the lessons and self-discovery. Having so many school works consumed to much of my time that lead me to slept late. How I overcome those problem is that I avoid procrastinating and less leisure time my projects are my priority, in short studies is my priority.

The most interesting discoveries I discovered from our lesson which in close to ICT is that I discovered how to use Prezi, Blog and I now know what were the easiest ways in using Microsoft Word, Excel and PowerPoint. Somehow, I encountered problems with my groupmates because we have a hard time in managing time management and some of my groupmates were not cooperating and not all of us has an internet connection and sometimes, I feel lazy.

The most challenging moment I have encounter is that when we are given a task to make a blog and making an article. It was not easy for me because I have difficulties in English. However, I learned that you need to do your best if want to past the subject and learned how to face your fears. Thus, also I learned that think twice before downloading and posting something on social media and how to spread awareness to the youth online.

The most important thing I learned personally are the self-improvement, discipline, confidence and time management. I realize that if you have many things to do you have to do it in advance. The best solution I did was that I just pray to God that I will be able to pass the semester and have knowledge how to do my projects and if I don't know how to do it, I ask help from my classmates and my sister.

The way teachers give us projects and school works are the ways for us to learn and to apply their teachings to us. And the main reason of that is it will help us in our future needs. Teachers want us to get information's from them and in the future, we will truly thank them for what they did to us. It is not easy to teach but with those teachers who perseveres in helping us to our better future because they sacrifice their time and efforts for us. And so, we must show to our dear teachers that we have something in return and that is to apply their lectures and we must strive harder.
