
MEMORANDUM

To: Lonny Grafman
From: Team Squared
Subject: Engr 215 Team²'s draft of Section One, Document Outline of the Permeable Pathway Project and Team Contract
Date: 2/12/18

Team Squared is submitting their first draft of Section One of the Permeable Pathway project document along with the document outline draft and their revised version of the course's team contract signed by all four members of the team.

Section One of the project document documents the Problem Formulation phase of the project, however the team feels that very little is known about the problem of project which makes it difficult to define a specific problem. However it is still early in the design phase and this is only a draft submission. Despite the unknowns the team is excited to go out and complete the project.
