

RG Assessment of Group Members

Brainstormers/ Lab period: Thursday 2-5pm

To: Lonny Grafman, Christopher Koier, Latufeo Kolopeaua, Connor Nowark

From: Brenden Chavez

Date: 2/9/2020

Re: Group Evaluations

Purpose:

The purpose of this memo is to provide truthful evaluations of myself, and all of the members of the Brainstormers group. A grade will be given to each member alongside a justification for that grade.

Evaluations :

Brenden Chavez: A

I believe that I deserve an A because I tried to incorporate interesting ideas for the project, as well as trying to thoughtfully consider what ideas my groupmates had. Although communicating with me was difficult because I did not have a phone right away, when we met in person I tried to keep the chemistry of the group strong. At times it seemed that we would get too highly focused on a certain aspect of the project. I would try to get us to move along and maybe try something else. I did not have much building experience which is an area that needed improvement. I also felt that I would be standing around at certain times.

Christopher Koier: A

Chris in my opinion was the most valuable member of the team. He was the only person with a vehicle, and he also had a bunch of building supplies/tools. His ideas would usually help us when we would be stuck or had a problem area. He was usually the handyman that knew how to work with all of the tools. I truly believe that this project would not have looked like how it did without Chris. One of the only problems was that he lived far away from the rest of us, but he handled it extremely well. He would also seem to get fixated on making certain aspects perfect, but that was manageable because we allotted a decent amount of time.

Latufeo Kolopeaua: A

Latu provided us a convenient place to work on our project. We were also allowed to store it at his house which was nice because the project was quite big. I found Latu to be quite a cheerful person which made him fun to work with. He would also come up with some really good ideas. He was our muscle man and would help with a lot of the lifting we had to do for the project. Communication would sometimes be an issue, but I think it was due to phone issues which I can relate to.

Connor Nowark: A

Connor wrote up the physics report that was required. This was important because we almost forgot to include it in our project. His friendly demeanor made him easy to work with. He brought some key components of our project like the speaker we would start with and button that we finished with. Something that could potentially be improved would be to not stand around. I had a similar issue where I would want to do something, but it would be difficult because we would get in each other's way.
