

MY JOURNEY IN OUR EMPOWERMENT TECHNOLOGIES CLASS

It was a roller coaster journey. My first though was hard because of all the projects, performance tasks, assignments and the other activities. I tend to think if I can still make it but then I didn't give up and keep on looking up to finish all the task given. Everything was though, all the topics especially when if I couldn't catch up, everything was hard until I keep striving more, I keep reminding myself to be more hard working even though we are flooded of tasks given. In this journey, it was both positive and negative for me. First is positive, by giving a lot of tasks, helps to manage my time and to be hard working. It test me to discipline myself to submit all the performance tasks. After all, it was a great experience because I learned a lot, it may be tough but still it's the "hard" path way to my future. Negative. Its stress me out about the early deadline, I couldn't think more because of the flood performance task given. Every meeting, there is always an activity and it's really hard for me to catch especially if I don't know the topic. Giving the task and next meeting is the deadline already and I couldn't do anything about that so I submit it anyway. I still give my best to do it early and submit it.

Some of the interesting discovery about making project is that being independent especially if it is individual. It motivates me to do more and work hard. By doing projects alone, it helps me to strive hard and to keep on my goal. I also discover to be more patient and positive that I can finish on time and to complete all the task given. The most challenging moments that I encounter in this subject is the moving making. I don't know how and I don't have much experience about it. It stress me out because I don't know how to edit, making scripts, being a director or even a cameraman. All I have to do is to be "extra", I also don't have the confident to be and actress and it's not my thing so maybe that was more challenging for me. Even though it was hard, I still manage to cooperate with my teammates and to do more by being "extra". And in exchange, the most powerful learning that I encounter is the Excel. I have much experience because we already tackled it in our past school and I'm really confident about it so I didn't worry that much. I was happy because I encounter this topic again so over all, it was the best learning. In facing problem about the task and all, I realized that I should just "PRAY", it was really needed especially when I'm down and lack of motivation. It helps me to strong and be positive that I can pass this problems. After praying, I cry in order for me to rise again. To keep on aiming my goals that I need to finish all this tasks given.

Life is hard. For me I need to be positive enough because life cannot be always sunny. It sometimes rains, snows, and more. That's why life is beautiful, just like my studies, sometime zero, sometimes perfect, that's why my senior high school journey is beautiful. In every hardship, all I need to do is Hard Work, to do more, to strive more. How did I communicate with my teammates? All I did was to be true about myself, by giving opinions, suggestion and everything that I can do. I give my best to carry the performance task as long as I can. In order for us to communicate, we're just open to one another because it's easily to work if you're comfortable with the people around. In this section, in this subject, I also clarify that if you are not intelligent enough, they will look down on you. They won't let your suggestion and opinions accepted, they will just ignored you. They will not trust you just because you're not intelligent enough. I know I'm not accepted in their standards of intelligence and I don't care. I came here in school to explore and learn more. I'm trying and I always will in order for me to achieve all my dreams. I maybe failed but giving up is not my deal. I will keep on looking forward. I will be patient and patient and trust my journey.
